

## Converting Measurements worksheets

|                 |                 |           |                 |
|-----------------|-----------------|-----------|-----------------|
| centimetre (cm) | millimetre (mm) | metre (m) | grams (g)       |
| Kilometre (Km)  | Kilogram (Kg)   | litre (L) | millilitre (ml) |

|            |              |              |              |
|------------|--------------|--------------|--------------|
| 1m = 100cm | 1,000m = 1Km | 1,000ml = 1L | 1,000g = 1Kg |
|------------|--------------|--------------|--------------|

Convert these lengths from m to cm

- 1) 1m                      2) 4m                      3) 6m

Convert these lengths from cm to m

- 4) 100cm                  5) 900cm                  6) 300cm

Convert these lengths from Km to m

- 7) 1Km                      8) 2Km                      9) 5Km

To access the 3 complete worksheets (including answers) with 24 questions on each worksheet, covering weights, capacities and lengths, at these levels of difficulty:

- no conversion required
- conversion required
- more challenging conversions required
