

Partitioning numbers in different ways

Partition each number in 3 different ways

Example $447 = 400 + 40 + 7$
 $447 = 400 + 20 + 20 + 5 + 2$
 $447 = 300 + 100 + 40 + 6 + 1$

Group 1	Group 2	Group 3	Group 4
1) 67 2) 35	1) 671 2) 325	1) 2,481 2) 5,923	1) 5.4 2) 6.71

To access the complete partitioning numbers in different words questions at 4 levels of difficulty:

- 2-digit numbers in words
- 3-digit numbers in words
- 4-digit numbers in words
- 5-digit numbers in words
